Dear Madam:

**APPLICANTS' RESPONSE TO
EXAMINER'S INTERVIEW SUMMARY**

Applicants submit this paper to clarify comments made by the Examiner in the Interview Summary prepared by the Examiner to summarize the January 8, 2009 telephone interview.

The Examiner's comments characterizing the nature of the claimed invention and the Sedun reference are confusing. First, Applicants' note that the Examiner does not completely and accurately characterize the claimed invention. The claims accurately define the invention.

With regard to the Sedun reference, the Examiner's summary of the interview is not clear. The Response filed on January 14, 2009, more clearly and accurately reflects the points made

during the interview to distinguish the Sedun reference from the claimed invention. Indeed, before addressing the points of rejection, page 5 of the Response notes that the "§ 102(e) rejection was also discussed during the interview and for the reasons discussed below."

Dated: February 13, 2009

Respectfully submitted,

Electronic signature: /William C. Geary III/
